The request for RCE filed on 08/06/2004, is acknowledged.

The examiner withdraws the prior art references Bezuidenhoudt et al. and Ramabхimaiah et al. applied in the 35 U.S.C. 103(a) rejections of the Final Office action dated 11/04/2003 in response to applicant's remarks that neither Nair et al. nor Yoshikumi et al. suggest the compounds of the formula I or II of the claimed invention.

Claims 1-4 are before the examiner and an action on the merits of said claims is contained herein below.

Minor objections

Claims 1 and 2 are objected to because of the following informalities:

- (1) In claim 1, line 8, the phrase "or" should be replaced by phrase "of".
- (2) The phrases "Hydrogen", "Hydroxy", "Phenyl" and "Methoxy" in all occurrences should be replaced by the phrases "hydrogen", "hydroxyl", "phenyl" and "methoxy".
- (3) In claim 1, line 12, should refer to "phenyl-ring optionally substituted".
- (4) In claim 2, the term "NFxB" should be corrected.

Appropriate correction is required.

35 U.S.C. 112, second paragraph rejection

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

(A) In claim 1, in the absence of the name of a sugar substituent claimed, render the claim indefinite wherein applicant fails to articulate by chemical name or structural formula, requisite to identifying the active substituent of a compound claimed.

(B) Claim 3, is vague and indefinite for stating "inhibiting COX-2 biosynthesis or COX-2 biosynthesis and NF_xB biosynthesis in a patient" as it is unclear what is the therapeutic effect or how is inhibition of COX-2 biosynthesis or COX-2 biosynthesis and NF_xB biosynthesis related to affecting any specific conditions in a patient.

Claims which depend from an indefinite claim which fail to obviate the indefiniteness of the claim from which they depend are also seen to be indefinite and are also rejected for the reasons set forth supra.

2. A review of the prior art revealed no references that could be appropriately applied on claims 1-4 directed to a composition for inhibiting COX-2 biosynthesis or COX-2 biosynthesis and NF_xB biosynthesis comprising a therapeutically effective amount of the compound of formula I or II.
